

Design Standards Letter

Letter Number: **D-1994-07**

Letter Date: **04/13/1994**

Effective Date: **04/13/1994**

Section/Plan No.: **Typical Section**

Subject: **Typical Sections Revisions**

Body

On Typical Sections D-50B-NPD, D-51B-NPD, and D-53-NPD the reference to pavement type has been deleted in order to avoid confusion. The directions for ramp design are given in Section 6-03.7 of the Policy Procedure and Design Manual. The update letters on the typical drawing number were not revised because no geometric revisions were made. The revision dates in the left margin were revised to 6-1-93 to coincide with the issuance of the New Pavement Design (NPD) procedure.

Drawing D-70E was revised and renumbered to D-70F in order to revise the thickness of plan mix bituminous base course from 12 inches to 10 inches.

The revised Typical Section drawings will be transferred electronically to all district design offices. Copies of the revised Typical Section drawings are enclosed.
