

Design Standards Letter

Letter Number: **G-1959-15**

Letter Date: **09/23/1959**

Effective Date: **09/23/1959**

Section/Plan No.: **None**

Subject: **Electronic Computer Program (Multiple Correlation)**

Body

TO ALL DIVISION, DISTRICT AND URBAN ENGINEERS:

A general description of the application and use of the multiple correlation program is supplied in the attached write-up.

Multiple correlation is a method of obtaining estimating equations from past records of performance and provides, by statistics, the reliability to be expected from these estimating equations.

You will, no doubt, encounter problems which will lend themselves to solution by this method. The Computer section will be glad to assist anyone desiring to make an application of this program.

**C. P. Owens
Engineer of Surveys and Plans**
