

# Design Standards Letter

Letter Number: **G-1961-10**

Letter Date: **02/08/1961**

Effective Date: **02/08/1961**

Section/Plan No.: **None**

Subject: **Erosion Control**

Body

-----  
**TO ALL DIVISION, DISTRICT AND URBAN ENGINEERS:**

**We are enclosing for your use on future projects a copy of the revised special provision for erosion control.**

**The first page of this special provision will be made up s a standard provision to be inserted in the contract by the main office. The second page will replace the special provision sent to you with Design Letter No. 27, 1960. dated October 18, 1960 and should be furnished by the district in accordance with previous instructions.**

**This new special provision eliminates the gradation requirements for agricultural limestone as set out in the standard specifications and provides a means of specifying the quantity of effective calcium required per acre in lieu of the quantity of agricultural limestone. We want to call your attention to the fact that we will specify effective calcium and not effective calcium carbonate equivalent.**

**You should note that if a soil test is not made, a rate of 700 pounds of effective calcium per acre will be used.**

**If there are any questions, please advise.**

**C. C. Tevis  
Engineer of Surveys and Plans**
