

Design Standards Letter

Letter Number: G-1961-33

Letter Date: 04/25/1961

Effective Date: 04/25/1961

Section/Plan No.: None

Subject: Standard Drawing 48.31; Standard Bridge Approach Slab for Bridge Roadway Drainage

Body

We are mailing, under separate cover, several copies of revised Standard Drawing 48.31, Standard Bridge Approach Slab For Bridge Roadway Drainage.

This standard has been revised to include depths of drop inlet up to 4' 0" in lieu of 3' 6" in order to obtain a greater clearance between the top of a cross road pipe and the bottom of base. The type of frame and cover to be used with the inlet has also been more specifically described.

This revised drawing will replace the present drawing dated March, 1961.

**C. C. Tevis, Engineer
Surveys and Plans**
