

Design Standards Letter

Letter Number: **G-1961-76**

Letter Date: **10/25/1961**

Effective Date: **10/25/1961**

Section/Plan No.: **None**

Subject: **Interstate Signing**

Body

TO ALL DIVISION, DISTRICT AND URBAN ENGINEERS

Our attention has been directed to the fact that Sheet No. 8 of 9 of Standard Drawing series 72.02 does not show how the 30" x 40" signs are to be mounted, and also to the fact that the list of sign revisions dated 03/15/61 improperly shows that these signs should be mounted on 2 WF 6" x 4" x 8.5 lbs. Signs of this size should be mounted on one 8.5 lb. post. If two 8.5 lb. posts are indicated on plans which are now under contract, it should be changed to one post. The standard drawing will be corrected to show the proper mounting for such signs.

**C.C. Tevis
Engineer of Surveys and Plans**
