Effective Date: 02/20/1962

Section/Plan No.: None

Subject: Letting Schedule for Interstate Urban and Primary Programs

Body

ALL DIVISION , DISTRICT AND URBAN ENGINEERS:

We are forwarding under separate cover several copies of a revised letting schedule listing Interstate, Urban and Primary System projects for lettings during the remainder of the current fiscal year ending June 30, 1962. No Supplementary System projects are included.

These projects were selected at a recent conference after a thorough review of project listings furnished by the Districts. They are intended to take up anticipated federal funds available for contract work permitted under reimbursable control during the remainder of the current fiscal year. The number of projects is limited because of the small balance remaining from third quarter funds and an anticipated reduction in contract funds that will result from proposed request for federal reimbursement on right of way projects.

In the event that additional funds become available, other projects can be added as needed. It is therefore essential that the districts continue their present work on programmed projects by completing plans and acquiring right of ways and completing utility matters as quickly as possible so as to be in a position to take advantage of such a condition should it occur. Should any of the projects listed fail to meet the schedule, other available projects will be substituted therefore, as necessary.

This office will add to each letting those projects selected by the Division of Supplementary Highways and Local Roads for contract obligation within available funds.

Every District and Urban Engineer is requested to acknowledge receipt of this letter and advise promptly if any project cannot be let on schedule so that early substitution can be made.

R. N. Hunter
Engineer of Surveys and Plans
