

Design Standards Letter

Letter Number: G-1963-11

Letter Date: 05/07/1963

Effective Date: 05/07/1963

Section/Plan No.: None

Subject: Standard Drawings

Body

ALL DIVISION, DISTRICT AND URBAN ENGINEERS

We are furnishing you under separate cover with several 8 1/2" x 11" copies of the following revised and new Standard Drawings.

Standard Drawing 21.50. Standard Approaches for Supplementary Roads, has been revised to provide for shoulder widths up to six feet. Tables for surfacing quantities were revised accordingly.

Standard Drawing 55.01. Steel Dams for Expansion Devices, was revised to add "6: Channel for Type A" to the title in order to distinguish this standard from new Standard 55.02 for four-inch dams.

Standard Drawing 55.02. Steel Dams for Expansion Devices, is a new standard covering four-inch channel steel dams used at expansion devices of bridge floors being resurfaced. The Division of Bridges furnishes the District with their recommendations as to the type and number of steel dams required for bridges on each resurfacing project.

Standard Drawing 85.00. Paved Approaches, was revised to change the dimensions on the valley section of paved approaches adjoining curb and gutter sections to be consistent with dimensions shown on Standard Drawing 84.01 for Curb and Gutter.

These standards will be included in the plans for all future projects where applicable.

Additional copies will be furnished upon request.

R. N. Hunter
Engineer of Surveys and Plans
