

Design Standards Letter

Letter Number: G-1963-16

Letter Date: 07/15/1963

Effective Date: 09/01/1963

Section/Plan No.: None

Subject: Standard Drawings

Body

ALL DIVISION, DISTRICT AND URBAN ENGINEERS

We are furnishing you under separate cover with several copies of the following revised Standard Drawings.

Standard Drawing 72.02 (sheet 2 of 11), Interstate Highway Signing, has been revised to add a small sketch of a sign showing "REST AREA" with "SLANT ARROW". This will eliminate the necessity of drawing a special sketch for this sign.

Standard Drawing 72.03 (sheet 5 of 5), Highway Signing, has been revised to permit either an aluminum alloy or a pastel Acrylic Plastic backing for delineators and to change dimension "Z" for delineator from 7/32-5/16 to 3/16-5/16.

Standard Drawing 72.03 (sheet 1 of 5), 72.05, 72.06, 72.07 and 72.08, Highway Signing, have been revised to change the details and clarify the requirements for footings in solid rock. The "h" depth of Type C-1710 Tubular Cantilever Supports were also revised on standard 72.07.

Standard Drawing 89.00, Grates and Bearing Plates, was revised to eliminate the Type I Grate which is no longer required for any of the Drop inlets.

These revised standards will be inserted in all projects where applicable beginning with the September 1963 Letting.

Additional copies of these drawings will be furnished upon request.

R. N. Hunter
Engineer of Surveys and Plans
