

Design Standards Letter

Letter Number: G-1963-31

Letter Date: 11/01/1963

Effective Date: 12/01/1963

Section/Plan No.: None

Subject: Standard Drawings

Body

ALL DIVISION, DISTRICT AND URBAN ENGINEERS

We are furnishing you under separate cover with several copies of the following revised Standard Drawings.

Standard 52.02. Cast-in-Place concrete piles, was revised to change ASTM specification for steel to Ad36-62T. This standard is now being included in all contracts where applicable.

Standard 72.01. Dimensional Data for Cutout Letters, was revised to add ampersand cut-out, and is now being included in all contracts where applicable. This will eliminate the necessity of the district to include special drawing for ampersand cut-outs.

Standard 87.20. Construction Identification Signs, was revised to add sign for 100% state fund projects. This sign shall be used on all future projects that are financed with 100% state funds except Maintenance projects. We have attached a copy of the special provision for construction signs that has been revised to cover all Identification signs including the new one. The revised special provision and Standard Drawing will be included in all applicable contracts beginning with the December 1963 letting.

Additional copies will be furnished upon request.

L. V. McLaughlin
Engineer of Surveys and Plans
