

Design Standards Letter

Letter Number: G-1965-50

Letter Date: 11/26/1965

Effective Date: 01/21/1966

Section/Plan No.: None

Subject: Special Provisions and Standard Drawing (New and Revised)

Body

ALL DIVISION AND DISTRICT ENGINEERS AND CHIEF COUNSEL:

We are furnishing you herewith, several copies of the following special provisions and standard drawing, all of which will be effective with the January 21, 1966 letting.

SPECIAL PROVISIONS

Portland Cement Concrete Construction (Pages 7 and 8)

This special provision has been revised as follows:

1. Change the percent by weight of deleterious rock in Section 105.1.1.
2. Delete the requirements for "false set" in Section 119.
3. Set out unacceptable filler in Section 157.2.4.1.

Weekly Statement of Compliance (Form PR-808)

This special provision has been revised primarily to include information on fringe benefits.

Highway Beautification

This special provision has been used in the past in a similar form and has now become sufficiently stabilized to include in all applicable Beautification projects.

Shop and Field Welding

This is a completely revised special provision covering shop and field welding. It will replace the special provision currently titled "Structural Welding (May 1965)", and should be used for all applicable bridge and signing projects.

STANDARD DRAWING

Standard Drawing 70.23. This is a new drawing which is the same as Drawing 70.16, except

that it has 240 volt multiple circuit instead of 480 volt. This drawing is designed primarily for use in the Kansas City area, but may be used anywhere in the State with the approval of the respective affected utility company.

L. V. McLaughlin
Engineer of Surveys and Plans
