

# Design Standards Letter

**Letter Number: G-1966-32**

**Letter Date: 11/16/1966**

**Effective Date: 01/20/1967**

**Section/Plan No.: None**

**Subject: Revised Standard Drawings and Forms**

## Body

-----  
ALL DIVISION AND DISTRICT ENGINEERS AND CHIEF COUNSEL:

We are furnishing you herewith several copies of the following revised Standard Drawings and Forms which will be used where applicable beginning with the January 20, 1967 Letting.

### STANDARD DRAWINGS

Drawings 53.40 and 53.41. These drawings have been revised to add a general note to the effect that "Quantities of concrete and reinforcing steel based on the sketches and tables will be used for payment regardless of any quantity changes necessary because of the type of pipe specified or permitted."

Drawings 71.00. Please note that this drawing was revised as explained in General Letter No. 31, 1966, which revision was intended for use beginning with the January 20, 1967 Letting. Subsequent to that transmittal, this drawing has been revised to change the schematic wiring diagram for power supply at the controller to provide as nearly balanced circuit loadings as possible. This drawing now carries a revision date of 1-67(R).

### FORMS

Form SP-37D. The message of the internally illuminated traffic sign and a few special notes have been added to the color sequence and flow diagram of the Type FDM4 diamond interchange controller.

Form SP-37E. Special notes have been added to the color sequence and flow diagram to describe the offset timer and detector interlock relay operation of the Type FI-6 diamond interchange controller.

Reproducibles of the above forms are available on request.
