

Design Standards Letter

Letter Number: G-1968-46

Letter Date: 11/19/1968

Effective Date: 01/01/1969

Section/Plan No.: P203.10, P604.40, P615.00, P703.51, P703.52, P703.53, P703.54, P703.55

Subject: Drawings for Use Beginning January, 1969

Body

ALL DIVISION AND DISTRICT ENGINEERS AND CHIEF COUNSEL:

We are furnishing you herewith several 8 1/2" x 11" prints of the following drawings which correspond with the Standard Specifications for Highway Construction, 1968.

203.10 Tabulated Earthwork and Section Data. This drawing has been revised in a general manner to update the information and sketches.

604.40 Guard Cable. NOTE - You were previously furnished this drawing with the same number and title. REMOVE and DESTROY the previous drawing and replace it with the attached drawing. The cable end fittings have been revised.

615.00 Office for Engineer. This is a new drawing, however, it is identical to the layout previously included with the special provision of the same title. This drawing is not listed on Form SP-2, dated 1-2-69, and should be added, if applicable, to the project.

This concludes our transmittals of drawings and the above now gives you a full set of applicable standard drawings, except as follows:

Drawings 703.51, 703.52, 703.53, 703.54, and 703.55 are listed on Form SP-2, however, it will be some time before the drawings are completed. They will cover certain sizes of concrete double box culverts and, when implemented, will be used by the district in a manner similar to the single box culverts.

In the future, when drawings are revised, the five digit number will be modified to contain an alphabetical letter denoting such revision. For example, Drawing 606.00, if revised, will become Drawing 606.00A. The date of the "A" revision will be indicated outside the margin of the drawing in the lower left corner.

Leland D. Fletcher
Division Engineer
Surveys and Plans
