

Design Standards Letter

Letter Number: G-1968-54

Letter Date: 12/19/1968

Effective Date: 12/19/1968

Section/Plan No.: None

**Subject: Shoulder Surface Treatment on
Resurfacing Projects**

Body

ALL DIVISION AND DISTRICT ENGINEERS AND CHIEF COUNSEL:

Your attention is directed to General Letter No. 19, 1968, dated June 4, 1968, and specifically to paragraph one (1) covering the same subject as this letter. This paragraph stated that "henceforth, shoulder surface treatment may be considered for resurfacing projects having a present traffic of 750 vpd or more when such resurfacing is intended only to maintain the service of the road without reconstruction".

This is to advise that such shoulder treatment will now be applicable only if the minimum shoulder width for the project is four feet or more. Earth shoulders only should be provided if the shoulder width is less than four feet.

This revision is effective immediately. Plans not yet submitted to this office should be corrected accordingly. Plans already submitted will be corrected in this office.

Leland D. Fletcher
