

Design Standards Letter

Letter Number: G-1969-54

Letter Date: 11/28/1969

Effective Date: 11/28/1969

Section/Plan No.: None

Subject: Seeding and Mulching Areas by Computer

Body

ALL DIVISION AND DISTRICT ENGINEERS

Attached is a sample of the Seeding and Mulching Area program output which is available as an off-shoot of the Earthwork Computer programs. Some Districts have utilized this program. This is to request that the Seeding and Mulching area program be utilized on all projects where earthwork is computed by the computer.

Form SP-271B, Earthwork Options and Output Requests, should be checked to request seed and mulch computation when a final earthwork run is requested. The Division of Construction has requested that this output data be furnished District Construction personnel.

We also want to advise that a Seed and Mulch area run can be made available on all active construction projects that have not been finalized out for use by construction personnel upon request.
