## Body

-----  
ALL DIVISION AND DISTRICT ENGINEERS

Attached are three sheets showing revised details for Supplementary, State, and Interstate Shields.

The Supplementary and State Shields have been revised to reduce the number of sizes used in order to incorporate them into the computer program for sign sizing.

Some of the sizes for the Interstate Shield have been changed to provide adequate space for the button reflector cut-out numerals we are now using. Silk screen numerals did not give the desired legibility required for traffic operations.

These revisions will be included in the next revision of the applicable drawings.
