

# Design Standards Letter

**Letter Number: G-1970-20**

**Letter Date: 04/27/1970**

**Effective Date: 04/27/1970**

**Section/Plan No.: P732.00**

**Subject: End Sections Drawing 732.00 (2 Sheets) and Special Provisions**

## Body

-----  
ALL DIVISION AND DISTRICT ENGINEERS

The following Drawing and Special Provisions incorporate Precast Concrete Flared-End Sections and Metal Flared-End Sections into one pay item description, Flared-End Sections.

### DRAWING 732.00 (2 SHEETS) - FLARED-END SECTIONS

This is a new drawing that combines Drawings 725.30B and 730.00A which are to be voided.

### SPECIAL PROVISION - FLARED-END SECTIONS

This Special Provision combines the text for Metal End Sections (Sec 725) and Precast Concrete End Sections (Sec 730). It provides payment for end sections without regard to the type of pipe [to] which they are attached.

### SPECIAL PROVISION - METAL PIPE AND PIPE-ARCH CULVERTS

Portions of the Standard Specifications which refer to Metal End Sections have been deleted.

### SPECIAL PROVISION - PRECAST CONCRETE FLARED-END SECTIONS

The section of the Supplemental Specifications has been deleted in its entirety.

These changes will eliminate the present conflict when specifying end sections for "Group Pipe".

The standard pay item number and description for this item will be:

732-00. Flared End Sections per each

(The 6th and 7th digits of the item number indicates pipe diameter.)

The above revisions are effective upon receipt of this letter and all plans submitted to this office in the future should, where applicable, indicate Flared-End Sections on pipes regardless of pipe type.

Copies of the Drawing and Special Provisions are attached.
