

Design Standards Letter

Letter Number: G-1970-31

Letter Date: 07/02/1970

Effective Date: 07/02/1970

Section/Plan No.: P903.03

Subject: Drawing 903.03D (7 Sheets)

Body

ALL DIVISION AND DISTRICT ENGINEERS

Attached is a copy of Drawing 903.03D (7 Sheets) which has been revised to include details for wood sign posts. (See Sheet 2 of 7).

This type of post has been added to our drawings for use at locations where it is probable a sign post could be struck from more than one direction. Such locations would be:

1. At Interchanges (certain signs along the crossroads, at crossroads-ramp intersections, and at crossroads-outer roadway intersections).
2. At Cross-overs.
3. At side road intersections.

If the roadway section or sign requirements will not permit wood post design as set out on Sheet 2 of 7, the present practice for specifying metal post shall still apply.

All future plans which include signing by contract are to be designed using wood post where applicable.

Leland D. Fletcher
Division Engineer
