

Design Standards Letter

Letter Number: G-1989-13

Letter Date: 09/20/1989

Effective Date: 09/20/1989

Section/Plan No.: None

Subject: Undersealing Pavement by Pressure Grouting MR SP-38C

Body

Attached is special provision MR SP-38C, Undersealing Pavement by Pressure Grouting. This replaces MR SP-38B under the same title. The revision reflects the latest criteria developed on the current projects and will require more holes and deflection testing after undersealing. It also eliminates the asphalt underseal as an option.

Also attached is an updated index of Material and Research Special Provisions.

The above revisions are effective with the December 8, 1989 letting.
