

Design Standards Letter

Letter Number: **G-1991-06**

Letter Date: **04/16/1991**

Effective Date: **04/16/1991**

Section/Plan No.: **None**

Subject: **Computer Program DE01 - Consultant Engineer Information**

Body

The above mentioned program is now available for general use. In order to access the program through the supersession main menu, it will be necessary to fill out and return the attached network access request to Information Systems. This program is intended to provide information concerning architectural, engineering, and related services on file in the division headquarters. The data in the program is provided for informational purposes only and the program will be maintained by the Design Division Headquarters.

It is suggested that the district design engineer and district chief designer obtain access to the program.

The computer file is based on the information contained in Standard Form 254, a copy of which is attached for your information. The database, as presently constituted, contains only the information on file in the headquarters office. Any information the districts may have on file which should be included in this database, should be sent to the Headquarters Design Division Office for inclusion.

Also attached for each district are two copies of the documentation necessary to use this program. Please advise if you have questions concerning the above.
