

# Design Standards Letter

**Letter Number: G-1991-15**

**Letter Date: 11/06/1991**

**Effective Date: 11/06/1991**

**Section/Plan No.: None**

**Subject: Special Provisions Flowable Backfill**

**Body**

-----  
**Attached is a recommended special provision for flowable backfill, as an alternate to standard compacted backfill for structures, pipes, utility cuts or other uses allowed and approved by the engineer.**

**We feel this may provide some contractors savings in certain areas and in some cases better consolidation.**

**It is anticipated that this special provision will not be extensively used, therefore the special provision will be added in the Headquarters Office when requested by the district. The request to have the special provision added should be submitted along with P. S. & E. submittals.**
