

Design Standards Letter

Letter Number: G-1992-04

Letter Date: 02/28/1992

Effective Date: 02/28/1992

Section/Plan No.: Pay Items

Subject: Culvert Cleanout, Bid Item 206-35.00

Body

It has come to my attention that there is some difficulty in properly estimating the above mentioned bid item. The information that is needed to properly estimate this item is listed below:

- 1.) Location of culvert by station.
- 2.) Type of culvert, i.e. corrugated metal or concrete.
- 3.) Length of culvert to be cleaned out.
- 4.) Size of culvert to be cleaned out.

This information should be listed for each culvert to be cleaned out. The information should be listed on the 2B sheet under the heading "Culvert Cleanout, Estimated." An example 2B sheet showing a method of presenting the needed information is enclosed.

The above information should be obtained from existing plans. No field measurement is required.

I realize that this is extra work for you in an already heavy work load, but the information is needed and your cooperation is greatly appreciated.
