

# Design Standards Letter

**Letter Number: G-1994-14**

**Letter Date: 09/07/1994**

**Effective Date: 09/07/1994**

**Section/Plan No.: None**

**Subject: Traffic Control Plan - Pavement Edge Treatment - Special Sheets**

**Body**

-----  
The cross section view on the special sheets depicting a pavement edge differential of 2 inches or less and the cross section view depicting pavement edge differential of 2 inches to 4 inches contradict one another, thereby requiring a decision be made as to type of edge treatments to be used. We were made aware of this contradiction by Construction Division personnel.

The special sheets were revised to eliminate the contradiction by changing the "2 inch to 4 inch" pavement edge differential to "greater than 2 inches to less than or equal to 4 inches" (>2" to < or = 4"). The 8 1/2" x 11" sheets and 22" x 34" special sheets have each been revised.

Attached for your information are copies of the revised special sheets.
