

Design Standards Letter

Letter Number: G-1996-11

Letter Date: 10/22/1996

Effective Date: 10/26/1996

Section/Plan No.: none

Subject: Revised 2BS Sheets

Body

The Design Development Section in the Support Center has revised the full size and 8½" x 11" 2BS sheets, for both English and Metric plans. These revisions involve the change in sign wording from "Road Construction..." to "Road Work...". Please note, too, on these sheets that the size of the GO20-1 and GO20-2a have changed. These revised sheets will be located in your district's ProCADAM FORMAT subdirectory.

These revised sheets are effective for the January bid opening.

These same sign changes also affect contract level course jobs. Projects less than two (2) miles (3 kilometers) in length should have 268 square feet (24.1 square meters) of construction signs. Projects greater than two (2) miles (3 kilometers) in length should have 288 square feet (25.9 square meters) of construction signs. Please use these quantities when submitting contract level course jobs. The traffic control plans for these jobs are included in the plans by Support Center Design.

Please make sure any January contract level course jobs use these quantities for construction signs.
