RE: STP Project—Project No. STP-9900(044)  
Request for Proprietary Item—Pedestrian Lights

Dear Mr. Dave Luther:

The City of New Madrid has in the past few years designed and constructed a new Veteran's Park as shown on the following pages. In the design and construction the city selected a particular pedestrian light for the Veteran's Park. This Veteran's Park is located in the middle of downtown New Madrid where the improvements for the STP Project No. STP-9900(044) is going to take place. The City of New Madrid is very aware that using Federal Highway and State of Missouri monies, there is no proprietary items allowed. However, the City of New Madrid is requesting that we be able to use a particular pedestrian light to match what is already existing downtown. Furthermore, the pedestrian lights (which are shown on the following pages) the city has in the Veteran's Park is the only pedestrian lights inside the community. Therefore, the city would like to have the same pedestrian lights throughout the community, especially within the downtown area. The specifications of the particular pedestrian light and light fixture the city has in the Veteran's Park and is wanting to continue to use is listed below.

Heritage Collection—Marietta Series—Aluminum Pole  
Catalog Number—DAA7L12PA  
Style—A  
Shaft Diameter—7 inches  
Color—Black

Respectfully submitted,

  
Donnie Brown, Mayor

CITY OF NEW MADRID
