State Design Engineer

RE: STP Project – Project No. TAP-9900(066)  
Request for Proprietary Item – Pedestrian Lights

Dear Ms. Auala:

The City of New Madrid has in the past few years designed and constructed a new Veteran's Park along with improvements for the STP Project No. STP-9900(044). In the design and construction of both projects, the city selected a particular pedestrian light. The current TAP-9900(066) project is an extension or another phase of the previous federal projects the city has constructed. The City of New Madrid is very aware that using Federal Highway and State of Missouri monies, there is no proprietary items allowed. However, the City of New Madrid is requesting that we be able to use a particular pedestrian light to match what is already existing from the Veteran's Park project and the STP-9900(044) project. Furthermore, the pedestrian lights the city has in the Veteran's Park and along Main Street are the only pedestrian lights inside the community. Therefore, the city would like to have the same pedestrian lights throughout the community, especially continuing along Main Street. The specifications of the particular pedestrian light and light fixture the city has in the Veteran's Park and is wanting to continue to use is listed below.

Heritage Collection – Marietta Series – Aluminum Pole  
Catalog Number – DAA7L12PA  
Style – A  
Shaft Diameter – 7 inches  
Color – Black

Respectfully submitted,

  
Richard Bodi, Mayor
