Chesterfield, MO 63017

I do hereby certify that in accordance with the requirements of 23 CFR 635.411(a)(2), this patented or proprietary item is essential for synchronization with existing highway facilities.

Kathryn P. Harvey, State Design Engineer

SUBJECT: STP-5438(606)
Rose Avenue Pedestrian Improvements
Proprietary Lighting Equipment Approval

Dear Mr. Schmidt:

With regards to the Rose Avenue Pedestrian Improvements project, the City of Brentwood is requesting approval to use proprietary lighting equipment for our streetlights. The City is requesting to use the following proprietary lighting equipment:

1. Sternberg 10' 4210-FP4 Augusta Series 4" OD Fluted Pole
2. Sternberg A880R Town Square Series Acorn Fixture

The City is requesting proprietary use of the equipment listed above due to the fact the City currently uses this equipment for all City-owned streetlights throughout the City. As such, the equipment is already in stock so that if needed, replacement can be handled relatively easily. The City believes that this request complies with Title 23 CFR 635.411(2)(2) as essential for synchronization with existing highway facilities.

Should you have any questions about this submittal, please contact Mike Erdtmann, P.E. at (636) 240-2444 or merdtmann@gbateam.com.

Sincerely,

Ellen Rottjakob, AICP
Assistant City Administrator/Director of Planning & Development
