Re: Request for a Finding in the Public's Interest
TAP-5410(626)
Chesterfield Parkway Pedestrian Bridge – City of Chesterfield

Dear Ms. Simmons:

HR Green is under contract with the City of Chesterfield to complete the design of the project referenced above. On the City's behalf we are requesting approval of three proprietary lighting items for use on the project. In order to meet the purpose and need of the project, we request the usage of the following three items for street light assemblies:

- King Luminaire K204 Viscount LED Pendant
- Stresscrete KSH22 Classic Concrete Pole
- Stresscrete KA30-S Decorative Arm

Although alternative products for this need and usage exist, we are requesting these specific products be used for aesthetic and maintenance reasons. Chesterfield Parkway has a long term landscape plan. The products requested are currently installed along the corridor and the City wishes to have a synchronized look throughout this reconstructed portion. These products are the standard products the City inventories for maintenance and repair. Additionally, these fixtures accept the luminaires maintained and stocked by Ameren. This is a City requirement for the products requested.

In accordance with 23 CFR 635.411(c), we request your approval of these proprietary items.

If you have any questions or require additional information, please do not hesitate to contact me at (636) 812.4202 or at dmaxwell@hrgreen.com.

Sincerely,
HR GREEN, INC.

David Maxwell, PE
Project Manager
