

MEMORANDUM

Missouri Department of Transportation
Project Delivery
Southwest District

TO: Eric Schroeter – de
State Design Engineer

CC: Jerica Holtsclaw – de
Design Liaison Engineer

FROM: Sean L. Matlock – sw
Transportation Project Manager

I do hereby certify that in accordance with the requirements of 23 CFR 635.411(a)(2), this patented or proprietary item is essential for synchronization with existing highway facilities.

State Design Engineer

DATE: October 11, 2016

SUBJECT: Rte 96, Jasper Co
Job No. J7P2228F
Replace Bridge over MNA/UP Railroads
Proprietary Item Certification/Public Interest Finding

For subject project it is requested that the following proprietary items be used:

- 15-ft Stresscrete Washington Coachman-style spun concrete light pole (Aztec Jade in Color).
- Stresscrete K445R-T1GR-IV-75(SSL)-4004-120V-K13-SRS-TB luminaire with LED lighting.

These items are being requested to be placed in the project for what is anticipated to be a December 16, 2016 letting.

After completion of the project, the City will be responsible for the cost of power along with replacing and repairing the proprietary items.

These poles and luminaires are the exact same scheme in downtown Carthage. The City will be buying these poles to have in stock to replace, if needed, for the court house and the newly constructed bridge.
